The learning and teaching of calculus across disciplines 3

Paris (France) – June 21-25, 2027

How do biologists, chemists, economists, engineers, computer scientists, physicists, and other STEM professionals understand and use Calculus and Analysis concepts in their disciplines? What does this imply for teaching and learning Calculus and Analysis oriented to scaffold students' learning in these disciplines, with particular attention to modelling, proof and AI integration? How do these concepts relate to broader mathematical knowledge that supports disciplinary thinking and practice?

The Learning and Teaching of Calculus Across Disciplines 3 (CALC 3DISC) conference builds on the first two Learning and Teaching of Calculus Across Disciplines conferences held in Bergen (Norway) in June 2023 and Milan (Italy) in June 2025. Continuing this trajectory, CALC 3DISC seeks to explore these issues by bringing together specialists in mathematics and in other disciplines, as well as researchers in their respective didactics.

We are pleased to announce that the First Announcement with a call for papers and posters, and the conference timeline are now available on the conference website:

<https://matriccalconf4.sciencesconf.org/>.

We encourage you to visit the website regularly, as it will be updated with important information regarding the conference, submission guidelines, key dates, and other announcements.

Please feel free to forward this message to colleagues who may be interested in the conference.

If you would like to suggest additions to our mailing list, please contact Thomas Lecorre at
